

## 8,974 tons CO<sub>2</sub>e – what now?

Soil & More prepares you and your staff within 6 hours for a changing climate

The 1-day climate change workshop includes:

- Calculation of your company carbon footprint
- Presentation of the agricultural footprint on climate change and the mitigation and adaptation potential of organic farming
- Awareness raising “climate game” for your employees to get a better understand of climate change and the unit of CO<sub>2</sub>
- Developing an outline for a climate change mitigation and adaptation as well as resource security strategy for your organization

Cost: € 1.750\*

Optionally Soil & More offers a 2-hour gardening workshop for your employees including an introduction on the concept of metropolitan agriculture. The planted crops (vegetables and herbs) can be used for home consumption or at your organizations cafeteria.

The gardening workshop will be jointly organized together with the “Young Organics e.V.” and the occurring charges will be donated to the “Young Organics” NGO.

Soil & More runs compost facilities together with organic producers in Egypt, India, Mexico and South Africa and already conducted more than 300 CO<sub>2</sub>- and water assessments for organic and conventional products. Soil & More is strategic partner of Demeter, Fairtrade, IFOAM and Rainforest Alliance.

\*The stated costs do not include out-of-pocket costs or VAT.
